

SAFEBOARD™

THE PROFESSIONAL'S CHOICE

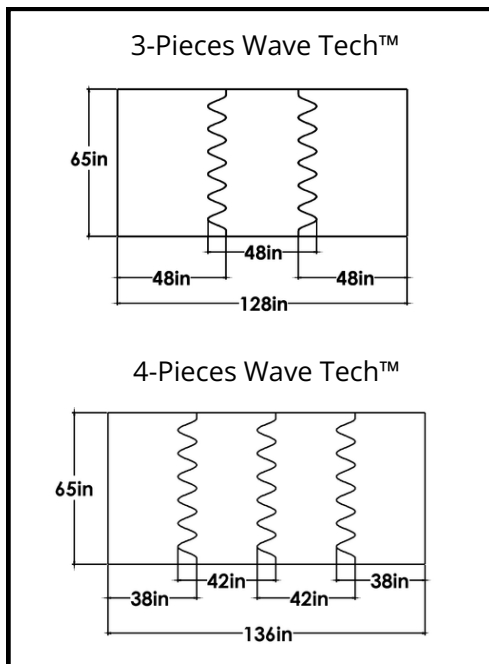

SAFEBOARD™ FMA FOAM MANUFACTURING ASSIST

SAFEBOARD™ FMA is a slab reinforcement panel engineered to reduce risk when putting thin-bodied porcelain, sintered stone, and ultra-compact surfaces through transportation, handling, fabrication, and installation processes. FMA is installed on the back of a slab before these processes to strengthen the slab and prevent breakage.

SAFEBOARD™ FMA comes in Wave Tech™ sets, which are easily assembled on the back of a slab using "Quick Stick" technology. Quick Stick is a pressure-sensitive adhesive pre-applied to FMA panels which makes for easy and fast installation. Just peel and stick!

SAFEBOARD™ FMA has enough rigidity to confidently reinforce slabs and provides vibration dampening and shock absorbing properties that prevent shattering during intensive processes. It is light, easy to use, and can be easily routed out for sink installation purposes.

AVAILABLE SIZES

APC037 - 65" x 128" x 10mm (1-Set)

APC034 - 65" x 128" x 15mm (1-Set)

APC035 - 65" x 136" x 15mm (1-Set)

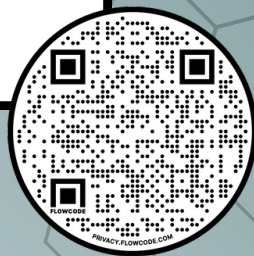

APC061 - 65" x 128" x 10mm (10-Sets)

APC059 - 65" x 128" x 15mm (10-Sets)

APC060 - 65" x 136" x 15mm (10-Sets)

*APC037, APC034, APC061, APC059 COME IN 3-PIECE WAVE TECH™
*APC035, APC060 COME IN 4-PIECE WAVE TECH™

SAFEBOARD™

THE PROFESSIONAL'S CHOICE

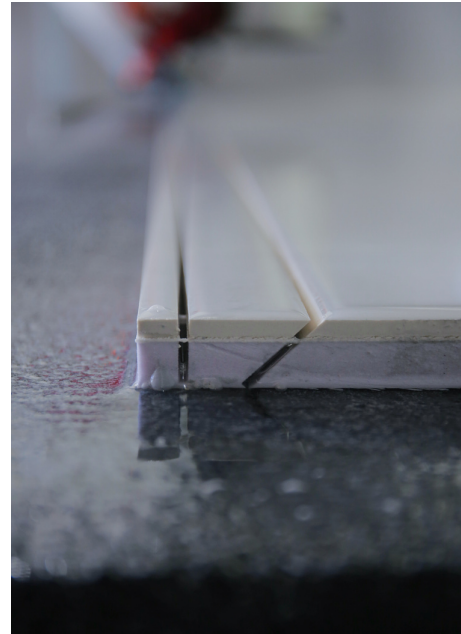

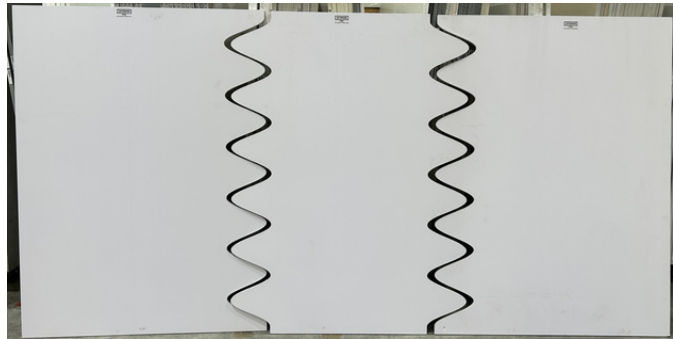

WHY USE SAFEBOARD™ FMA?

SAFEBOARD™ FMA has the following qualities:

- No Formaldehyde Emission
- Water Resistant
- No Mold Growth
- Easy to Route, Cut, and Machine
- Light and Easy to Handle
- Shock Resistance
- Vibration Dampening
- Excellent Dimensional Stability

SAFEBOARD™ FMA is a risk-reduction panel that will ensure your new porcelain slab will make it through fabrication and installation without any problems.

With SAFEBOARD™ FMA bonded to your slab, you no longer need to fear catastrophic failure during handling, fabrication, and installation processes. FMA provides all the safety you need to use porcelain to its fullest. The panels are lightweight and easy to ship and install.
